

LIQUID SIGHT GAUGE

For Oil Filled Transformers

Series 806 1" NPT

Series 808 G1"

Series 815 Prismatic Oil Sight Gauge

FEATURES

- Single piece Brass / Aluminium body construction.
- Dual rubber sealing provides leak proof assembly.
- Crystal clear, tempered glass lens.
- Highly visible expanded PU float.
- Stainless Steel retainer for float.
- Each level gauge pressure tested after assembly.

PRISMATIC OIL LEVEL INDICATOR

This is used for providing direct view of oil level inside transformer tank. It may be fitted on conservator or on the side wall of hermetically sealed transformer.

Operation & Application:

Most oil used in electrical equipment is colourless and the level is difficult to see without aid. The 806/808 series level indicator provides a red/black float which indicates the level of oil in the tank.

For higher span of levels in a tank, multiple units at different levels may be used. The gauges are recommended for use with fluids having a specific gravity of 0.80 or higher.

Technical Specifications	
Operating Temperatures:	
In oil	-25°C to 100°C
In air	-40°C to 80°C
Operating Pressure:	Leakproof till 100kPa or 15psi
Standard Material:	
Body	Brass / Aluminium Alloy
Indicator Window	UV protected Polycarbonate / toughened glass
Mounting:	
806:	1" NPT
808:	G 1"
815 series	With 4 or 6 Bolts
Options:	
Dial Markings	Min/max, high/low on polycarbonate
